Mr. Benjamin Shadgett.

REPORT

OF

THE VISITING JUSTICES.

The following Report of the Visitors of the Lunatic Asylum at Wotton, in and for the County of Gloucester, made in accordance with the provisions of the "Lunatic Asylums' Act, 1853," was laid before the Epiphany Court of Quarter Sessions, held at Gloucester, for the County of Gloucester:—

HE Visitors have pleasure in reporting that the Works at the County Lunatic Asylum, which were sanctioned by the Court at the last Easter Quarter Sessions, are pro-

gressing favourably.

The two separate dayrooms on the male side are nearly completed, and the alterations and additions in the lower male wards are considerably advanced, and it is hoped will be fit for occupation before next summer. These promise to impart quite a new aspect to a part of the building which had long been an opprobrium to the institution, having been constructed long ago, when the provision thought necessary for the care of lunatics was very different from what has been since found to be most advantageous for them. It was gloomy, and unsuitable for promoting those habits and feelings which, for the sake of cure and improvement, it is most important to encourage.

The alterations on the female side promise also, when completed, to become great improvements: it is hoped that this

portion will also be again occupied in the summer.

The enlargement of the Recreation-Hall is nearly completed, and seems likely to afford the means of a large proportion of the patients being present at these occasional entertainments, which they enjoy so much, and which are found from experience, not only to cheer them and promote good feeling among all parties, but to conduce actively towards cure.

The Chapel is not so much advanced as the other buildings; the foundations, however, were laid and built up to the ground-line before winter, so that the work may be proceeded with

vigorously as soon as the season permits.

The progress of such works in the midst of the Institution has of necessity rendered the management of it much more difficult, not only from the immediate contiguity of so many strange workmen, but also from the curtailment of airing-yards and the closing of some ordinary dayrooms, causing an undesirable crowding of patients both indoors and in the yards. The Visitors have therefore the more satisfaction in reporting that the establishment has been maintained in a satisfactory condition throughout the year. No serious accident of any kind has occurred nor anything to interfere with the harmonious working of the Institution.

The health of the patients has been generally good, and although rather more than the ordinary number of deaths, amounting to 87, have occurred, they have been principally among the aged and feeble cases.

The number of cures, however, has been very satisfactory, amounting to 82 discharged as cured, and 25 sent home relieved; so that the whole number of discharges from the house, including seven out on trial, two escapes, and one returned not insane, have amounted to 204, exceeding the number of admissions, which have been 181, by 23. Diminishing by that amount the pressure upon the means of accommodation which existed at the close of 1870, this has prevented the necessity of refusing admission to any patients sent direct from parishes within the county, which it was feared must have been resorted to, until the new buildings were completed. It is now hoped that those pauper lunatics belonging to unions in the county who are confined in other county asylums may soon be received here also.

The number of patients remaining in the Asylum at this time is 581, against 604 at the close of last year, and less than in the year 1863, when the numbers were 593. Considering that the admissions during 1863 had been 152, and those of the three preceding years had barely exceeded an annual average of 140, and that the rate of admissions for the last four years had risen to an average of 180, the fact that the pauper lunatics remaining in the County Asylum have not increased with this great increase of admissions, but have rather decreased, is very remarkable, and can only be accounted for by the greatly increased proportion of discharges.

Such a result could be effected only by great skill in general management and unwearied attention to each individual case shown by the superintendent, Mr. Toller, supported as he has been this year by two very able medical assistants, Dr. Thomas A. Buck and Dr. James A. Philip. It is the more creditable to them because the circumstances before alluded to have placed this year unusual difficulties in the way of management.

The ordinary entertainments, too, which have been kept up in spite of the difficulty of finding sufficient space, have entailed upon the officers and those who have had the arrangement of them a greatly-increased amount of care and labour, and it is highly creditable to them that they have been maintained at all.

Increased license to visit their friends has this year been granted to a large class of patients who have long been inmates of the Asylum, and it is believed with good effect. The friends, also, of patients who, though not cured, did not appear likely to derive material benefit by remaining at the Asylum, have been encouraged to remove them; and the guardians in many instances have shown a disposition to assist by giving a liberal allowance to the parties at their homes, and in other cases have afforded some extra diet and comforts in the Workhouse to those sent there: the number of such cases discharged relieved is 25.

Arrangements have been made for the employment of two additional night attendants. Also, in consequence of alterations, the engineer is enabled to occupy a lodge and sleep upon the premises, which is considered a circumstance of advantage in case

of any emergency arising at night.

A coal-ash walk has been made round the Asylum grounds, which enables the female patients to have a day walk almost

every day in winter.

Miss Martha Mary Davies, who died in August last, by her will gave and bequeathed to the governors and trustees for the time being of the Gloucester Lunatic Asylum, for the benefit of that institution, the sum of £10,000. 3 per Cent. Reduced Annuities. This legacy has been claimed by the trustees of Barnwood House Institution, as representing the charity portion of the Gloucester Lunatic Asylum as it existed from its commencement until the separation in 1856, and has been continued since under the same trusts and for the same objects. The Visitors, having carefully considered this question, are disposed to agree in this view, reserving, however, their right in case of dispute to assert their claim under the will.

The Commissioners in Lunacy visited the Asylum on the 18th of March, and made a report, which was read to the Court at the

next sessions, and is appended hereto.

J. CURTIS HAYWARD, Chairman.

REPORT OF THE COMMISSIONERS IN LUNACY.

GLOUCESTER COUNTY ASYLUM, SATURDAY, 18TH MARCH, 1871.

ESTERDAY and to-day we have visited every part of this Asylum, and seen all the patients excepting seven, who are at present away on leave. The structural changes, which have been submitted to and generally approved by our Board, will be begun as soon as the vote is taken for the cost of them next week; and besides other conveniences and advantages much required, will include a detached chapel for the accommodation

of 320 patients and 30 officers.

Since this Asylum was last visited in October, there have been 63 admissions (of which 18, or somewhat over a fourth, were re-admissions), 33 males and 30 females; 38 discharges, 16 males and 22 females, of which all but 3 of the former and 7 of the latter were recoveries; and 38 deaths, 22 males and 16 females, all from disorders ordinary in Asylums. No inquest was found necessary in any case: the principal causes having been general palsy and epilepsy, apoplexy, and other forms of brain disease, senile decay and exhaustion, phthisis, and other diseases of the lungs. Nineteen post mortem examinations were made, the proper notification having been given in each case, and the due consent obtained. (Since this was written Mr. Toller has handed to us the form employed, with a view to its being laid before our Board.)

The numbers on the books are 599, 279 males and 320 females, leaving in each division 17 vacant beds; and of these patients, 278 males and 314 females were seen by us in the several wards and the farm cottage yesterday. Their condition upon the whole was good, their persons and their clothing in both divisions being well attended to: but we very strongly recommend that, for winter wear, all the men should have under flannels, and the women more woollen dresses. In other personal respects there is also satisfactory report to make; absence of excitement being the rule in all the wards, and the exceptions limited to two or three inmates of the female epileptic ward, and one noisy woman in lower fourteen: while of strong or unsightly dresses we noticed none among the women, and not more than one or two in the men's division.

It gives us pleasure to have still to remark, as on many former occasions, how much is done here to counteract disadvantages incident to the many structural defects of the wards by the liberal supply, not alone of associated amusements, but of ward entertainment and occupation. The library is unusually good, and the arrangements for frequent and sufficient distribution of the books all that we could wish. The schools also continue to work fairly well, especially on the female side, where we found twenty patients variously occupied to-day, there being an average attendance daily of about twenty-five, and by the services of a schoolmistress (formerly a patient), having evident interest in the duty, elementary instruction being actually imparted to many The average attendance on the men's side is about 20. but here the work is hardly so well done; and it will be well worth the attempt to obtain, when practicable, equal efficiency as on the women's side. The associated recreations are frequent and various; the numbers present varying from 140 to 250—the former at the weekly dances, and the latter at the theatricals. and magic lanthorn, and other winter shows.

The beds and bedding throughout the Asylum we found to be in fair condition, but we must make exception as to some of the coir beds, which will, however, we are assured, be all replaced ultimately by hair. Such earth closets as are in the wards we thought were in an unsatisfactory state; and we regretted to learn that arrangements have not yet been made to supply a change of water in bathing to each patient. A difficulty is doubtless interposed by the inadequate bath-rooms, but this defect will be partly supplied on the men's side by the room with two baths, which the impending structural changes will involve; and we should strongly recommend that a new general bath-room be built in the female division.

The records show that the regular daily employment is as usual: on the men's side 58 being engaged on the land, 28 at trades, 18 in other general useful work, and 2 as lodge porters: while on the women's, 68 are at needlework, 40 in the laundry department, and 7 in the kitchen offices: the mere workers in the wards of both sexes being about 100. The numbers at the Religious Services, limited still by the inadequacy of existing accommodation, average 220 of both sexes on Sundays, and 52 on week days. We saw the dinner in the wards yesterday, which consisted of beef-steak pudding and potatoes, boiled in their jackets, with half-a-pint of ale to each person, and thought it good as well as properly served.

The seclusion since the last visit which we find recorded comprises 57 instances, applicable to 25 patients; but this no longer includes the class of cases—of which we observed some as we passed through the wards, and specially adverted to at the last visit—where

the door is locked upon patients in the day time, to prevent intrusion from others. We think it desirable, as well as necessary, still to include these, which will accordingly be done. From the same records we learn that 44 of both sexes are under treatment for bodily disease, one woman suffering from typhoid fever. has not, however, been any special cause for what will have been noticed as a somewhat high rate of mortality during the last five or six months; this having resulted from the many old cases and the unusual severity of the winter. The numbers seen by us in bed yesterday were not more than 5 of each sex, the health of the Asylum being at present generally good: but these were scattered over all parts of the building, and it seems to us especially desirable that such arrangements should at once be made as will admit of a ward being set apart in each division as an infirmary for the sick, where there should be special nursing and hospital comforts. The suggestion for additional night attendance made at the last visit, has not yet received the favourable reception to which it is entitled, and which we trust will shortly be given to it.

Mr. Toller, who continues to labour zealously and successfully in his important duties, has now very efficient help from his

Assistant Medical Officers, Dr. Buck and Dr. Philip.

(Signed,)

JOHN FORSTER, JOHN D. CLEATON, Commissioners in Lunacy.
